

baby oil or boot polish. Oil, gloss or gel is used to add sheen to the face, legs, hocks and dock, with or without colour. The equine equivalent of foundation – specially designed 'cover up' – is also available in black, white or brown - black to blacken legs or unwanted colours in tails or to cover marks or scars; white to cover up unwanted yellowing in tails, or in an emergency to cover up stable stains;

brown to cover up marks and scars or unwanted lighter coloured tail hairs.

Keeping cool

With the tension mounting towards the big day, many owners will be concerned that their horses will get over-excited or be stressed and a bit of a handful in the show ring. Calming products will be popular at this time of year and there is a vast

Is there something missing from your retail shelf?

Groomers skin and coat care products for canine and equine are recommended and used by professional groomers, charities and top leading riders.

They are attractively packaged for retail sale and will enhance the quality of your presentation and sales.
